

MONTAGE

WINTER
2014

DELIVERING CHEER AND SMILES

Welcome to the Winter 2014 edition of the Montage and Happy Holidays!

We hope the season finds you in good health (oral and overall!) and good spirits. The MDHA supports community outreach programs throughout the year and as we all know, this time of year

often requires extra helping hands for those less fortunate.

This year, as in past years, the MDHA lent many hands to help deliver hampers - and smiles - for the Christmas Cheer Board. Thank you to the "elves" and to all MDHA members who have so graciously given back to this wonderful community we all share in.

MDHA VISION

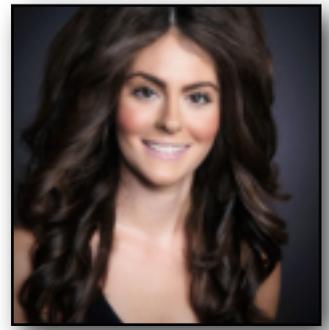

To be the collective voice of Manitoba Dental Hygienists in promoting the profession; cultivating partnerships with member-owners and other stakeholders and empowering our member-owners for the good of the profession and the public

MISSION STATEMENT

To advocate and promote the profession of Dental Hygiene; represent our member-owners, encourage lifelong learning and evidence based practice; and provide education & health promotion to the public. This includes:

- Acting as the collective voice, resource and advocacy body for Dental Hygienists
- Providing professional development and social networking opportunities
- Encouraging continued growth and development of the profession
- Creating public awareness of the profession of Dental Hygiene
- Providing opportunities for health promotion, education and community outreach

MESSAGE FROM YOUR PRESIDENT

As the winter season steadily approaches, I eagerly await and anticipate its traditions: the trimming of the tree, indulging in a mug of eggnog, the heralding of carols, the white blankets of snow, the sparkling of seasonal lights and the celebrations of sharing with loved ones, families and friends. Let us love winter and make it a time to remember.

In early October, members of the Manitoba Dental Hygienists Association Executive Board of Directors attended the Canadian Dental Hygienists Association Leadership Summit, Annual General Meeting and Continuing Educational Sessions and Workshops in Moncton, New Brunswick. With all those in attendance, we together explored the latest evidence-based dental hygiene research, technology, philosophy and practice.

We were fortunate to have a variety of presenters, on a wide range of topics. Guest speaker, Huw Williams, President of Impact Public Affairs, presented two interactive and engaging sessions on advocacy and media training. With his extensive experience in the government and the print, broadcast media, those present learned of grassroots lobbying, how to ensure concerns are heard by political decision makers, and strategies to be the voice of their association in the media. Huw was a captivating orator and the MDHA is confident that all will prove useful in the future.

Undoubtedly it takes someone special and quite courageous to be the President of the CDHA, as the position demands passion, endless dedication, motivation and resilient strength. Congratulations to our own Mary Bertone on the completion of an astounding and inspirational CDHA 2013/14 presidential term!

I had the privilege of being openly welcomed by the New Brunswick Dental Hygienists Association, Team Cigarettes, to participate in the Canadian Breast Cancer Foundation CIBC Run for the Cure, running 5km along side my fellow NBDHA colleagues in torrential downpour of rain, in Moncton's Parc du Centenaire. I would like to personally extend my sincere appreciation and deepest thanks to the NBDHA; this was intra-professional collaboration in its truest form and demonstrates the beliefs of the CDHA at its finest. That day, my thoughts were with all Manitoban dental hygienists, their families and friends who participated in our MDHA Team Brush for the Cure. A heartfelt thanks to you all!

The conference was indescribable; the immersion of Acadian culture, life and travel, the breathtaking sceneries and lobster dinners with fellow colleagues, and the opportunity to learn from, network and connect with those who share same passions was irreplaceable. The upcoming 2015 CDHA National Conference will be held in gorgeous British Columbia. Make plans to join us in Victoria. I hope to see many of your familiar smiles there!

The frozen dates of late January traditionally signify the gathering of all collective members of our oral health teams from across the province. Instead, this year the coming of Spring will mark the commencement of the 131st Manitoba Dental Association 2015 Annual Meeting and Convention. It is a genuine honour to be hosted by the Keystone Centre in the beautiful city of Brandon and to celebrate our profession with our rural colleagues.

The Manitoba Dental Hygienists Association will commence its program by hosting our fourth annual MDHA Business with Breakfast meeting, on Friday April 17; one of the many benefits inclusively for our participating membership. With those in attendance, we will together explore ownership linkage and various based activities.

(continued on next page)

This year, the MDHA is pleased to announce and welcome our Keynote Speaker Jo-Anne Jones, DH, President of RDH Connections Inc. As a successful entrepreneur and internationally recognized speaker, Jo-Anne brings life, energy and inspiration to all her presentations. Her strong and powerful messages leaves oral health audiences with renewed confidence and enthusiasm for the profession they have chosen. We are delighted to introduce two presentations: "The Dental Hygiene Process of Care. Is your Practice on Track?" and "Shift Happens! Changing Paradigms in Oral Health Risk Assessment". All are welcome, as we are certain that Jo-Anne's unique experiences, personal talents and expertise will prove invaluable to each and every individual comprising the oral health team.

The Manitoba Dental Hygienists Association genuinely looks forward to sharing, with each of you, in all the experiences, opportunities and memories this convention has to offer! Please visit <https://manitobadentist.ca/registrations/index.cfm> for further details and additional information.

Life on this earth is only too short, so my final wishes and hopes for each of you in this New Year is this ... live for the moment and with intent, laugh too much, appreciate those you care about, have the courage to be true to yourself and love with every inch of your heart and every depth of your soul.

Merry Christmas, Христос Рождается, festive holidays and best wishes to you and your families for continued joy, happiness, health and prosperity!

MESSAGE FROM YOUR PRESIDENT ELECT

What a wonderful autumn we had! October 5th in particular sticks out in my mind. That day at Shaw Park were millions (it seemed) of people - there to take part in the CIBC Run for the Cure. Amongst them was the largest Team MDHA Brush for the Cure ever, with 58 participants. For the second year in a row Team MDHA Brush for the Cure was the top fundraiser of all the CDHA teams, raising \$3,431.00. Our very own Harriet Rosenbaum was the top individual fundraiser, bringing in \$1,296.00. Great job, Harriet, and a big thanks to the Team and all of our supporters!

(Harriet Rosenbaum, right)

(Team MDHA

Brush for

the Cure)

In the days following the Run for the Cure there were concerns raised about hygienists who were not MDHA members being allowed to participate in an MDHA organized activity for PAR accreditation. Your Board heard your concerns and the following policy statement was adopted: "In 2013 the College of Dental Hygienists of Manitoba (CDHM) allowed participation in the Canadian Breast Cancer Foundation(CBCF) CIBC "Run for the Cure" on Team MDHA Brush for the Cure (hereafter known as The Team), to qualify for accreditation as a Professional Activity Record (PAR) towards the CDHM Continuing Competency Program registration requirements. The Team is promoted and organized directly by the MDHA (under the umbrella of the CDHA teams); as such, participation on the Team will be a benefit limited to MDHA members, and their non-dental hygienist family members and friends."

Registration for the Team is done on the Canadian Breast Cancer Foundation website and is not within the direct control and regulation of the MDHA. Starting In 2015 any hygienist not holding a current MDHA membership who registers to be on the Team will be informed via email that participation on the Team is for MDHA members only. Following the event a list of the MDHA members on the Team will be forwarded to the CDHM for PAR accreditation. Another benefit of MDHA membership!

(continued on next page)

When I joined the MDHA Board a few years ago I was really pleased to learn that the MDHA prepared food hampers and made deliveries for the Winnipeg Christmas Cheer Board. I'm happy to say that the tradition continued this year. Lead by Community Outreach Chair, Leanne Sanche, our food drive went from November 26 to December 12th with donations of non-perishable food items and toys accepted at the MDHA office. MDHA President Larissa Bubnowicz, Leanne and I got our Santa hats on and delivered the donations to the Christmas Cheer Board on behalf of the MDHA on the evening of December 12th. We then had a great time together spreading some Christmas cheer by delivering some Christmas Cheer Board hampers. Thank you so much to everyone who participated and helped brighten the Christmas of people less fortunate!

(Leanne Sanche and Larissa Bubnowicz at the MDHA office with collected items)

I am watching the twinkling lights on favorite time of year. For me it means special baby long ago and the His birth meant

our Christmas tree as I write this - my celebrating of the birth of a very promise of hope, joy, and peace that

Whether it be Christmas, Channukah, Kwanza, Diwali, Ashura, Bodhi Day, Yalda, or something else, may your celebrations bring you joy and the new year be filled with good health, love, peace, and LOTS of every good thing!

With my very best wishes,

Heather Sirkovsky, RDH

Hygienists of Manitoba;
Season's Greetings and
Good Wishes for the New
Year!*

MESSAGE FROM YOUR EXECUTIVE DIRECTOR

I have been working in a management position with non-profit associations for over 11 years and throughout that time I have had the privilege of working with a diverse group of people in a number of different types of organizations - regulated professions, trade associations, special interest and professional group associations. During this time period, it has become apparent that there is some confusion surrounding the differences between a Professional Regulator or College and a Professional Association. The differences are significant and I am hoping that this article will assist readers in understanding those differences and the unique roles of the College of Dental Hygienists of Manitoba and the Manitoba Dental Hygienists Association.

As you all know, dental hygiene is a self-regulated profession having achieved that status in 2008 after much government advocacy by the MDHA's elected board members and its Legislation Committee. The benefits of being self-regulated are many, including greater autonomy and control over your profession as well as professional recognition by others, to name a few. When a profession is granted self-regulation, they enter into an agreement with government, which gives the government some control over the profession, for the purpose of protecting the public, while at the same time allowing the occupational group to set the standards, rules and regulations by which all professionals must practice. Self-regulation allows the regulatory body, consisting of a member-elected Council, based on the current legislation, to set the entry requirements and standards for the profession rather than having another profession set those requirements.

To practice, Dental Hygienists in Manitoba must be registered in the 'practicing category' and meet certain requirements on an annual basis to ensure that they are competent to practice their profession. It is the responsibility of the regulatory body, as stated in government legislation, to set a process by which the competence of dental hygienists is evaluated on an ongoing basis. The requirement for continuing education helps to ensure that dental hygienists maintain a level of competency that contributes to public safety.

On the other hand, the MDHA is your Professional Association, the mandate of which differs greatly from that of the CDHM. While the CDHM must put public safety first and foremost, the work of the MDHA focuses on how to best serve its members. The MDHA offers a number of quality continuing education programs annually and it is partly through these programs that our members are able to meet their annual CCP requirements established by the CDHM. This is only one of the ways that the MDHA works in collaboration with the CDHM, with each considering the other as a professional "partner".

In addition to the professional development programming organized by the MDHA, we also have a mentorship program, providing much needed guidance to dental hygiene students who are the future of the profession in Manitoba. As well, MDHA supports a community outreach program that serves to promote dental hygiene and educate Manitobans on the importance of oral health for overall well-being. Some of the work done by the MDHA is visible to our members, while other work is done behind the scenes. Regardless of whether your Association's work is evident to you or not, rest assured that it is always done with the best interest of our members in mind. The MDHA will advocate on behalf of our members where appropriate, however, has no power or jurisdiction over employer/employee relationships, nor do we have any authority to change regulatory requirements as regulation falls under the authority of the College of Dental Hygienists of Manitoba.

The purpose of this article is to provide insight into the differences between the College and the Association, both of which are critical to the success of dental hygienists in Manitoba and we hope that we have achieved this to a small degree. The MDHA is here to serve our members and if you have questions at any time we welcome them and will do our best to provide you with a satisfactory answer.

Membership in your provincial Association also means that you are a member of the Canadian Dental Hygienists Association, which provides valuable resources to dental hygienists.

Visit <http://www.cdha.ca>, to find out what the CDHA has to offer.

Respectfully Submitted by
Kim J Wozniak, MDHA Executive Director

FROM THE SCHOOL OF DENTAL HYGIENE

DENTAL HYGIENISTS!

Were you one of the chosen few in your graduating class?

The Sigma Phi Alpha Delta Chapter is the School of Dental Hygiene's honor's society which inducts three graduating students every spring. The students prove themselves to be worthy of this honour as they have demonstrated leadership qualities, are high achievers and have provided service to their colleagues or the community at large. We have members who have become president of the Manitoba Dental Hygienists Association and some have gone on to become president of the Canadian Dental Hygienists Association. Furthermore, our members have provided exceptional community services to diverse groups and individuals. Others have become the Directors of the School of Dental Hygiene.

We will soon be choosing our new inductees from the class of 2015 as well as the recipient of a Book Scholarship for a deserving DH II student. Members will be contacted to renew their membership in our Chapter and if you are a member and have not heard from us by mid-April, 2015, we have lost contact with you. We are asking that you contact us at sigmaphialpha.deltaeta@gmail.com for a membership form. Our annual meeting, held at the end of April, will be announced at a later date. Lastly, we would like to inform you that the meeting may be used as a PAR.

We hope to see all our members at the meeting!

Diane Girardin
President

CONTEST! MEMBERS IN THE COMMUNITY!

Part of MDHA's Mission includes providing education and health promotion to the public – we couldn't meet this objective without your dedicated effort.

Our members are doing a lot of great work and we want to highlight it – and say thanks! – to you for supporting community outreach initiatives.

Share your Community Outreach experience (either through MDHA or your own initiative) for a chance to win one of two gift cards for \$10 in each edition of the Montage!

Send a short write up of your experience (include pictures if you want) and send to info@mdha.ca.

*Winning submissions will be randomly drawn and announced in the next edition of the Montage

MORE WAYS TO ACCESS THE e-CPS ONLINE

FREE ACCESS TO COMPENDIUM OF PHARMACEUTICALS AND SPECIALTIES (e-CPS)!

Working with the Canadian Pharmacists Association, publisher of the Compendium of Pharmaceuticals and Specialties (CPS), CDHA is pleased to offer an exclusive benefit, not available through any other dental hygiene association. All CDHA members have free access (a \$349 value) to both the desktop and brand new mobile versions of this valuable electronic point-of-care tool.

The CPS is used by more than 200,000 Canadian healthcare providers as a primary source for drug information. It contains more than 2000 product monographs, indications, formulations and doses, relevant practice guidelines, and patient information.

Both the desktop version and CPS mobile on CPhA's RxTx app offer quick and easy search functionality by brand name, generic name, therapeutic class, manufacturer, and DIN or NPN. Both are bilingual, updated regularly, and feature Health Canada advisories.

NEW e-CPS RXTX MOBILE APP

CPS mobile on CPhA's RxTx app is available for downloading on iOS and Android devices and adds a notes feature,

favourites list, email and print functionality, interactive calculators, offline capability not requiring Internet connection except for installation, direct link to publisher, and much more.

Using your mobile device, visit www.cdha.ca/ecps to download the RxTx Mobile app

"DEAR EDITOR"

From a friendly dental hygienist in the community...

I would like to thank the MDHA for donating toothbrushes for my oral health presentation at Gillis school on October 29, 2014. Lindsay D'Eon and I gave a presentation to Ms Semonick's grade one class, which was a huge success. The class was very interested in how to take care of their teeth, and the many different things we use teeth for. We ended the presentation with an egg experiment which showed the benefits of fluoride.

Naomi Hunter-Wong

In Memory

The College of Dentistry and School of Dental Hygiene solemnly confirm the passing of Ms. Sheryl Feller on November 25, 2014. An alumna of the School of Dental Hygiene, Class of 1970, Ms. Feller was a 2014 recipient of the Alumni of Distinction award for her outstanding contributions to the profession and the community at large.

A long-time educator, administrator, management consultant and clinical practitioner, Sheryl Feller set several benchmarks both for women and dental hygiene professionals in Manitoba. She was the first woman in Manitoba to earn the Certified Management Consultant (CMC) designation and the first to serve as President of a provincial institute of CMC consultants. She was also the recipient of two entrepreneurship awards from Women Business Owners of Manitoba and the Distinguished Service Award from the Canadian Dental Hygienists' Association. Ms. Feller was also a gold medal graduate of the School of Dental Hygiene (1970).

The College of Dentistry and School of Dental Hygiene offer most sincere condolences to the family and many friends of Ms. Sheryl Feller.

Our beloved Tatyana Peleg has passed away at the age of 53, on Tuesday, December 2, 2014.

She will always be remembered by her family and friends for her endless kindness, and love. May she rest in peace, you are in our hearts.

(As published in the Winnipeg Free Press on December 04, 2014)

On behalf of the MDHA, deepest condolences to the friends and families of Sheryl Feller and Tatyana Peleg.

PROFESSIONAL DEVELOPMENT

2014-2015 Professional Development has begun. The opener, on October 20, was Oral Health Care During Pregnancy. Dr. Schroth gave a very informative session to 38 participants. **Did you know** that it is safe to diagnose, treat, take radiographs and to deal with immediate dental needs during the first trimester? That periodontal issues in pregnant women do not determine preterm low birth weights (April 2012, JCDA)? And that it is safe for pregnant women to take acetaminophen with codeine, amoxicillin and ASA (ASA only on a short term basis)?

Dr. Schroth emphasized that educating pregnant women on oral health is key to their overall health and well being.

The second lecture, on November 18 2014, was about Oral Candidiasis by the ever popular Dr. Perry (*right*). 27 people participated. **Did you know** that age, certain medications, decrease in saliva, systemic and nutritional disorders, tobacco smoking, and poorly maintained prostheses are some examples of predisposing factors to oral candidiasis? That a change in the management of the disease is that the Nystatin Oral Suspension is no longer swallowed but rather held in the mouth for 5 minutes 4 times per day? That Viaderm Ointment is the medication of choice for Angular Cheilitis?

Dr. Perry clearly stated that it is more important to identify and manage risk factors than to only manage the infection itself.

On November 3, Dani Bobtbyl (*right*) presented Part 2 of Contemporary Ultrasonic Instrumentation to a sold out audience of 16 people. This was a hands on lecture for participants who had taken Part 1 last year. Each participant was equipped with a Dentsply Cavitron, maniquin, several ultrasonic instruments, and a tooth with cement. We were fortunate to have the use of the lab on the second floor of the dental college. Dani tailored the experience to many of our questions and individual needs. Did you know that channeling is the advancing of the tip over the treatment surface in channels so that all segments are accessed? That insufficient stroking particularly overlapping strokes, is the principal cause of incomplete deposit removal?

(continued on next page)

November 4, Part 1 of Ultrasonic instrumentation was presented by Dani Botbyl to 22 participants. Dani presented an overview of ultrasonic instrumentation. She discussed the anatomy of the ultrasonic tip, how to select the right tip to get the job done, and how to adapt the tip to the root surface. She also recommended a book called Ultrasonic Periodontal Debridement theory and Technique by M George, TDonley and P Preshaw (2014). Like Dani's lecture, this book will definitely change your current perceptions about debridement with ultrasonics. **Did you know** that ultrasonic debridement is aimed at the definitive removal of biofilm and remaining calculus without intentional cementum removal and can be done to completion with ultrasonics? That high-volume evacuation has been shown to reduce the aerosol produced during ultrasonic instrumentation by more than 90%? Thanks so much to Dentsply for sponsoring this event. Look forward to their return next year, especially if you missed out this year or want to take Part 2 next year.

In Conclusion, there are still openings for the remaining two lectures. Sign up early for the Convention, we are having the amazing Jo Anne Jones from RDHU. Hope to see you!!

Respectfully, Karen Kiazzyk Kaatz, RDH

***NOTE: MDHA Rural Committee is looking for rural members to come together to talk. We will do Skype, face time, etc, so don't let distance hinder you. MDHA is committed to hearing from their rural members. Contact us at karenkkaatz@hotmail.com or Amanda at amarten@mdha.ca if you wish to be part of this challenge. Our goal is to have our first meeting in January. Terms of reference are available. Thanks for your continued support.* -Karen
